

Why It Matters

Walk for Strength is a signature event hosted by the Association for Creatine Deficiencies. This event unites the Cerebral Creatine Deficiency community as we come together for patients impacted by GAMT, AGAT, and CTD and to advance newborn screening and research efforts for these patients.

Community Engagement

CCDS are rare disorders. Our annual Walk for Strength event allows patients to unite on this day in a global effort to raise awareness for these three cerebral creatine deficiencies. Last year we had 364 walkers which included 17 teams worldwide.

Fundraising

Monies raised from the 2020 Walk for Strength will go directly toward the ACD PatientStrong Program, which provides patient-centered educational initiatives and support. Our virtual walk will unite CCDS patients in a global initiative to strengthen community ties and bring awareness of the three disorders.

Sponsors

All sponsors enjoy sponsorship level recognition on Walk website, ACD's upcoming Virtual Conference, newsletter & social media recognition (over 180,000 impressions), and logo featured on 2020 Walk shirts.
