

Creapure®, high-quality creatine monohydrate, made in Germany

Creapure® has been manufactured according to the strict standards and procedures of the German pharmaceutical and food industry by AlzChem Trostberg GmbH for more than 20 years.

AlzChem ensures the highest safety and quality standards in its Creapure® creatine product line, as it is produced in a dedicated production plant specifically designed to eliminate the risk of cross-contamination and contamination by other products. It is IFS Food, Kosher and Halal certified. Creapure® is vegan and vegetarian friendly. Each batch of Creapure® is individually tested for purity before leaving the manufacturing facility.

Creapure® is used in dietary supplements in sports & health nutrition, food and pharma markets worldwide. These premium supplements show the Creapure® logo as a seal of quality on their labels.
