

## Why It Matters

The Walk for Strength is a signature event hosted by the Association for Creative Deficiencies. This event unites the Cerebral Creatine Deficiency Syndrome (CCDS) community, bringing families together to advocate for patients with GAMT, AGAT, and CTD. CCDS are rare disorders. The Walk for Strength creates a space for rare families around the world to raise awareness and invite their communities to advocate alongside them and show support.

## Fundraising

Monies raised from the 2023 Walk for Strength will go directly toward the ACD PatientStrong Program, which drives all ACD initiatives, supporting ACD in the mission to provide patient family, and public education, to advocate for early intervention through newborn screening, and to promote and fund medical research for treatments and cures for CCDS.

## Sponsors

### FAMILY & SMALL BUSINESS SPONSORSHIP PACKAGES
