

Why it Matters

The Walk for Strength is a signature event hosted by Association for Creative Deficiencies. This event unites the Cerebral Creatine Deficiency Syndrome (CCDS) community, bringing families together to advocate for patients with GAMT, AGAT and CTD, CCDS are rare disorders. The Walk for Strength creates a space for rare disease families around the world to raise awareness and invite their communities to advocate alongside them and show support.

Fundraising

Monies raised from the 2024 Walk for Strength will go directly to the ACD PatientStrong fund, which drives all ACD initiatives. All donations support ACD in the mission to provide caregiver and clinician education, advocate for early intervention through newborn screening and fund CCDS research.
