

CCDS Scientific + Patient

SYMPOSIUM

June 26-28 2026

Midway, Utah

United for a Cure: Advancing Science, Supporting Families

The Association for Creatine Deficiencies (ACD) is a children's non-profit with the singular mission of curing Cerebral Creatine Deficiency Syndromes (CCDS). CCDS are a group of 3 rare brain diseases that results in early childhood:

- Speech delay
- Gross motor delay
- Seizures
- Autism
- Failure to thrive
- And more

The June 2026 scientific & patient symposium is critical to helping our children. CCDS families, clinicians, and researchers will gather for scientific talks while Kids Camp at the National Ability Center will give affected children and their siblings the opportunity for all-ability outdoor recreation to learn and grow. The weekend concludes with our Champions for a Cure fundraising gala.

Our children and their families need your help. Sponsor support makes all of this possible as many families carry medical debt that makes travel impossible. We are seeking sponsors to help cover flights, hotels, meals, and activities so families can attend worry-free.

Email programs@creatineinfo.org to connect about sponsoring.

Sponsor Benefits	Premiere Sponsor \$20,000	Family Day Sponsor \$10,000	Family Travel Sponsor \$5,000
